

Hydraulic System Manual

Purpose:

Provides hydraulic power to industrial equipment.

Normal Conditions:

Pressure: 140-180 bar

Oil Temperature: 40-60°C

Inspection Checklist:

- Inspect oil level.
- Check filters.
- Verify pump condition.
- Inspect hoses and fittings.

Failure Indicators:

- Oil leakage
- Pressure drop
- Excessive noise
- Temperature rise

Corrective Actions:

Replace filters. Flush hydraulic circuit. Replace damaged hoses.
